

PLEASE READ:

1) Adams Cable Service will follow the path of power. If you have underground power, your cable line will be buried as well, if applicable.

2) In the case of a new construction, we may need to conduct a survey for no additional cost. Please be aware that the survey itself is at no charge, however if there is any construction needed, there will be additional charges. We will collect half the construction costs before work can be started and the remaining construction costs will be collected at the time of installation. No one is required to be present for a survey. Surveys can take up to 14 business days to complete.

3) On the day of the installation, someone over the age of 18 must be present during the installation and authorized to sign the work order as complete. If there is no person of age at the residence at the time of installation, you will need to reschedule.

7) Plan to secure all pets and animals, both indoor and outdoor, during your installation appointment.
